

# CYBERSAT

## An Operational Perspective

Rob Lynn  
8 Nov 2017

- **DISA supports the DoD root requirement for SATCOM:**

## **Assured Access**

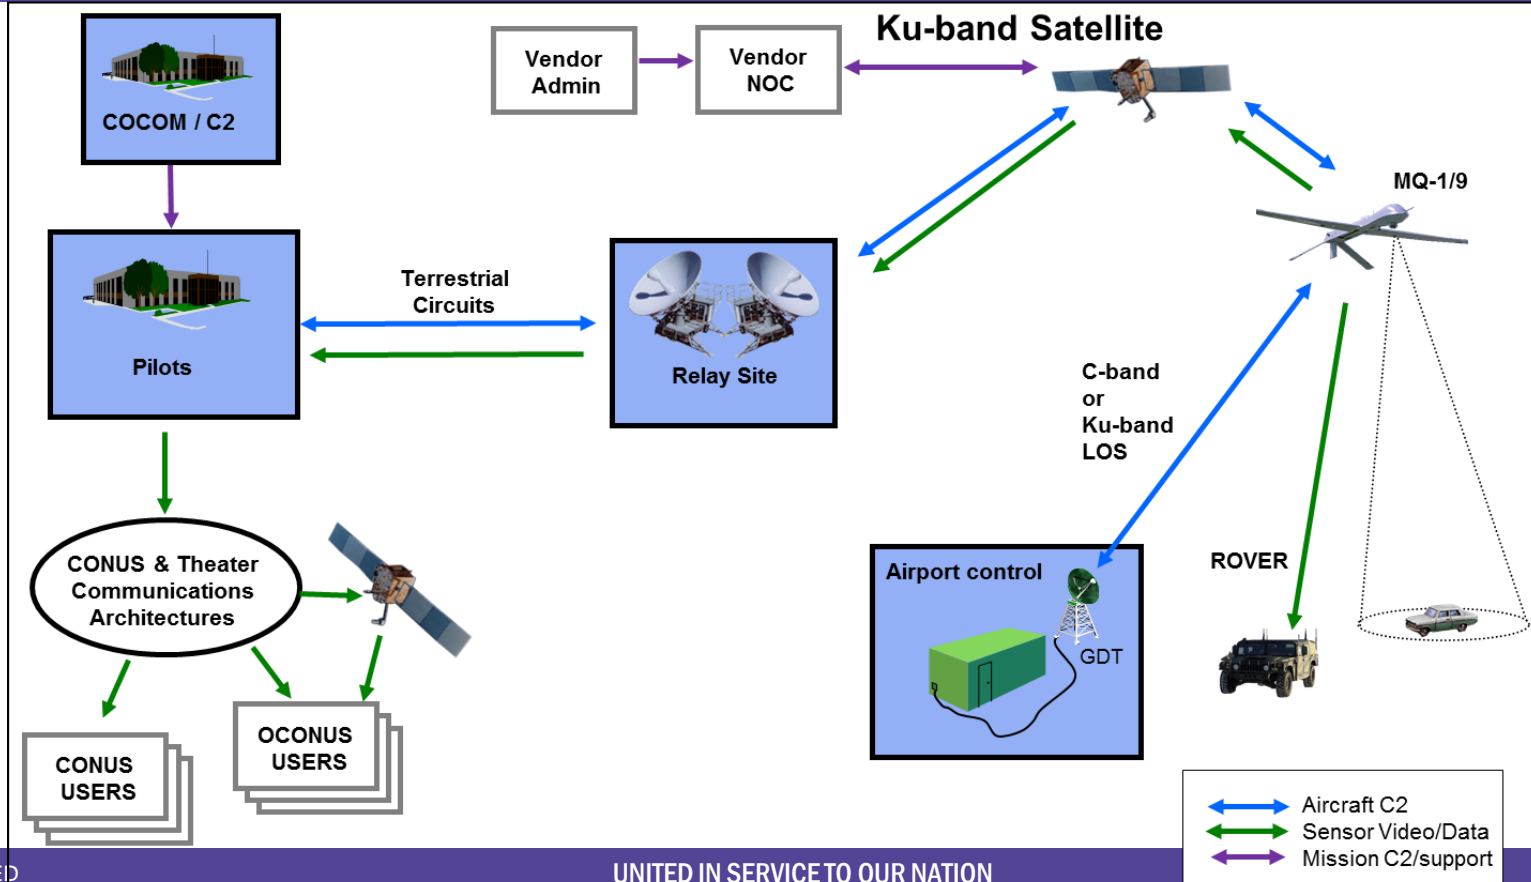

- **Assured Access factors**
  - **Capacity**
  - **Resiliency**
  - **Security**

# Challenges

- **Tools**
  - Historically SATCOM has had to develop its own tools
  - Tools have been developed independently (stovepiped)
  - About 5 years ago, common interfaces began to evolve
  - More SATCOM tools are available off the shelf now; however, few are holistic with the greater cyber environment

# DoD ISR Example

**DEFENSE INFORMATION SYSTEMS AGENCY**  
The IT Combat Support Agency
